(Full Office Note.)

Petition No 518 of 1903-04

‡ **Subject.** Petitioners.— Timme Gauda and other Raiyats of Maddalur Village in the Sira Taluk

Subject. Alleged curtailment of agricultural facilities in the village of Maddalur by steps taken in the interests of Toddy Revenue.

* **Note.** Report on the Subject has been called for by His Highness the Maharaja.

1. Maddalur is a large village consisting of more than 4000 acres and containing 4 or 5 majare villages. It is in the heart of the date area and (according to Petitioners) there is no Survey number, occupied or unoccupied, on which there is not a number of date trees. It is further situated on the borders of the Bellary Collectorate and like other villages of the Sira Taluk similarly circumstanced, has to supply toddy to shops in the British Territories as well as in Mysore.

2. 2. The Petitioners' grievance is that the list of Varams or Govt date Groves in the village has been made so comprehensive that they cannot get any new lands for cultivation - even such of them as had been

‡ 1. No. and date of latest letter or paper.
2. Catch words to show nature of subject.
3. Subject to be in red and body of note in black ink.

Encm Comm's letter No 6395/254 dated 3rd February 1904. (8 nos 3).

* 1. Statement of case in narrative form in regular sequence of subject matter or date.
2. Opinions to be stated only as supported by precedents, or general rules which should always be quoted.
3. Serial numbers in file, &c., to be always stated.
4. Dates of important documents referred should be given.
5. Write on both sides, leaving the same side as margin.

once under the plough but relinquished on account of poor crops, or graze their cattle & keep concealed in the jungles of the village notwithstanding the Mamlatdar's Circular No. 180, or obtain their most necessary supply of date wood, leaves etc for fuel, fencing & rope making. They pray that survey numbers having date trees ranging from 20 to about 100 or 150, as well as the fallow portions of other numbers may be made available for occupation.

3 The Deputy Revenue Commissioner made a careful investigation into the complaint with the aid of the Mamlatdar. The facts elicited are noted below.

4 There are nearly 2000 acres under cultivation in the village, and of these 600 acres, or 30 per cent, have been kept untilled

5 The Varnan List comprising Government unoccupied Survey Numbers containing date trees has an aggregate of 67 numbers measuring 235.9 acres. Of these, 24 numbers containing 18.2 acres are unassessed waste and 43 numbers containing 46.7 acres are assessed waste. Of the latter again, 22 numbers containing 17.4½ acres had been once under cultivation but relinquished in the years noted in the margin.

6 It is seen from the marginal table that 11 numbers containing wet 7.2 acres, most of all the wet lands relinquished were relinquished within the past five years, most of them in the year 1899-00. It is explained

1877-78. Dry 1.
1880-81 " 1
1898-99 " 5

understood that the lands must be
put under the plough and not kept
in the occupier's hands as a date
"reserve." The Excise Comm^r has accepted
this view and suggested that applications
for date lands may be granted only when
there are no other waste lands available
for bona fide cultivation". He has
expressed the doubt if in the present case
the Petitioners require the lands mentioned
in their list for purposes of cultivation.

Notwithstanding the foregoing views,
the Dy Excise Comm^r has given the most
lenient consideration to the prayer of the
Petitioners. He has recorded his opinion
that out of the 27 numbers noted in the
Petitioners' list, 12 (namely 4 dry, 1 partly
dry and partly wet, 5 wet, 1 partly wet
& partly garden and 1 garden) aggregating
135½ acres and containing 1350 trees
may be given out in whole for cultivation,
and that ten other numbers (namely
5 dry and 5 partly dry partly wet) aggregating
17½ acres and containing 2750 trees
may be so phoded as to separate the portion
actually covered by date trees from the
tree-less portion in view to the latter being
given out for cultivation. Of the remaining
five numbers, four aggregating 37½ acres
and containing 1530 trees have been
noted for reservation, and one containing

7½

½ acres and 250 trees has been already cut for cultivation by getting the trees shaded off. The Excise Comm^r has stated nothing about the forming boundaries of the Dr Excise Comm^r but says he has forwarded the petitioners' memorial to the Deputy Commissioner for due consideration in connection with the list of reservation which was before him. The final draft list of lands embodying the result of the consideration bestowed by the Deputy Comm^r has not yet been received.

12 In the above mentioned list-prepared by petitioners to the Dr Excise Comm^r there is a significant footnote under the hand of the A. C. which does not appear to have attracted the notice of the Dr Excise Comm^r. It therein stated that out of the numbers mentioned in the list, one namely No 62 Dag measuring 32½ acres and containing 1000 trees, is desired by one or two rayats only, and that it is the wish of the other persons that the other numbers should continue to be owned by forest dwellers because if they are taken up by any body by cultivation a large number of persons residents in Maiara Dasarhalli, near whose the lands are situate would be put to inconvenience for want of standing timber for their cattle & sheep. This is to ensure

Contd

the grantee to make them own terms with the Zaptieh of Godby Khoba. It cannot also be made a condition of the grant that the grantee should obtain from engaging the benefit of the date trees standing on the lands concerned. The reservation of grant rights to such trees has already been more than discountenanced. The grant must be absolute. Such a grant in the present case seems preferable to grant rights at any rate it ought not to be made until all available lands are brought under cultivation. Sub division too is allowed with inconvenience and should not be resorted to except in exceptional cases.

Copy post up. — flag Z (by order of 1907 Superintendents Mss. under Rules 385 & 387 of the Imperial Revenue Manual).

17 Land has been materially reduced by representations ordered for these purposes, the amount payable by the Villages which must necessarily be a fluctuating item may be brought under revision.

18 As regards dead wood & leaves the rules are sufficiently clear and liberal & no case for any special treatment has been made out. C.

26-5-04

1835/30 V.M. Rules 113 to 115 of the Imperial Revenue Manual

Please keep a copy on the file of Mss.

4/11 28/5/04

The reservation of date trees has as a general rule been prohibited - but, as in this case, special circumstances require special treatment - This rented that dry lands with light land assessments are granted and for cultivation in good faith but for the use of woody trees which they contain - The land assessments is also paid not by the person as the Excise rent a revenue - but land on the other hand is taken up only when lands are full & given up after that years cultivation. This practice is not conducive to the creation of a permanent right in the trees which are so much wanted by the Excise Dept in this locality - Thus there arises where both a conflict between the true of the cultivating Ryots & the Excise Dept, and also cases of dispute which require a special adjustment other than what follows from the application of General Rules - The new system of reservation of trees was based upon the hardship

and inconvenience resulting therefrom. But if the people themselves are willing to accept an arrangement which secures the amount of the special assessment will depend with the interests entirely I do not see why such an arrangement should not be effected. Before however finally any question finally in this matter I would ask the Govt. could ascertain the wishes of the people of the locality regarding the reservation of these and the grant of lands for cultivation subject to such reservation. A special enquiry might be held either through the Distt Dy Commr or any officer of the Govt Dept and the result reported to me as early as convenient.

Serial No.	
4	To the Excise Commr in Mysore No: 786 & dt 6/6/1904. Regrets him to ascertain the wishes of the Maddalur and surrounding villages regarding the reservation of date trees and grant of lands for cultivation, subject to such reservation, and states that a special enquiry may be ~~made~~ held in the matter.
5	From the Excise Commr in Mysore No. 1212 & 26/7/1913. States that the recommendations of the Deputy Commr may be accepted, as the lands, except gomal lands, have already been given out for cultivation and that certain the assessed waste lands are being given out for cultivation when the ~~tank~~ tank gets a sufficient supply of water. 23. The grievances of the petitioners are fully set forth in Para 2 of these notes (supra) and have been discussed

NOTE —Contn. sheet.

in pages 2 to 11 of these notes.

4. The petition contains 3 complaints:-

1. Curtailment of agricultural facilities owing to the inclusion of cultivable lands in dalē reserves;

2. Charging higher rate of kulbanni, though the area of kulbanni land is reduced,

and 3. Lack of supply of dalē leaves and dead dali wood for fire-wood, rope making, etc,

25 Point no 1. The petition complaining of the curtailment of agricultural facilities is dated the 3rd August 190[illegible] Since then the village has been resurveyed. The village consists of more than 4000 acres of land and about half of which is under occupation. The dalē reserve list of 1903 consists of 67 nos, measuring about 2300 acres. The list of 1913 with the Settlement Officer's opinion consists of 65 nos, of which 23 nos measuring 273 acres are either given out for cultivation or are made available for

6.

Serial No.

this purpose, and the rest measuring 2065 acres is recommended for reservation.

(enclosure to R (no 1)) In the list forwarded by the Petitioner 27 numbers are mentioned as lands which may be given out for cultivation only 5 of these, measuring 83 acres, (nos 255/1, 263, 277, 279 & 283). have been recommended by the Settlement Officer for inclusion in the Dale Reserve list. As the Dy Commr & the Excise Commr have not made any special reference to these, it has perhaps to be presumed that they are also of the same opinion. In the list prepared by the Amildar of the Taluka, these five numbers have been shown to be waste lands either from 1899 or since the resurvey, and it may therefore be presumed that there is no demand for these lands for cultivation.

N

The Excise Commr proposes in his latest reference that the recommendations of the Dy Commr, Dharwar Dt, may be approved. They are seven survey numbers which may be given out

R no 5 in the file (Prefix under proposal no 2)

Serial No.

for cultivation, that Gomal lands may be included in date reserves and that the rest of the assessed waste lands may be given out for cultivation when the bank lets a sufficient supply of water. The Settlement Officer is of the same opinion as regards the last two points. The Excise Commr perhaps considers that the recommendations of the Dy Commr bring down to a minimum the curtailment of agricultural facilities complained of by the ryots in 1903.

10 & 17 in Flag N.

It is proposed that only Gomal lands available may be included in the date reserve list with the concession that the villagers may exercise their rights of grazing etc, with requisite restrictions.

5 (para 2)

The Excise Inspector reports that no inconvenience will be caused to the ryots by this arrangement. It is doubtful if this arrangement will not work hardship to the villagers. If these numbers are considered as unassessed unoccupied lands, the people may exercise their rights of grazing and the

as grazing is prohibited in date groves.

excise authorities may control the tapping of trees etc. This incidental question does not interfere with the main point viz the curtailment of agricultural facilities in the village.

26 Point 2. If the kuthanni is very high the Dy Comm^r may reduce the rate, if proper representation is made to him by the people.

27 Point 3. The rules issued ~~on the subject in 1904~~ in 1911 on the cutting of date leaves and dead date wood appear to give ample facilities regarding the legitimate requirements of the villagers concerned.

Pages 113 to 115 of the Mysore Excise Manual.

28 The petition of 1903 was forwarded by the Private Secretary to H.H. the Maharaja for a report. May the Excise Comm^r's proposal be sanctioned and may an endorsement be given to the petitioners?

Paper under disposal

35 This case relate to a petition from the villagers of Maddalur, Sira Taluq complaining of the want of agricultural facilities owing to steps taken in the interests of toddy revenue. The petn was sent to the Excise Comr so far back as June 1904; & the report has been received 9 years later.

Paper under disposal No 2. (Slno 5).

36 The report called for from the Excise Comr, at the instance of the late Dewan was about the to ascertain the wishes of the people of the village regarding the reservation of date trees & the grant of lands for cultivation subject to such reservation. From the Extract of Gl Asst Comr's letter dy 25-12-1904, it appears that the ryots wishes to have

(1) 5 survey Nos & in their own holding with fit trees reserved for excise purposes

(2) assessed waste lands mentioned in the list submitted by them to be taken up by them as occasion arises, the dale trees to in their being reserved

& (3) the Gomal lands in the list not to be reserved.

37 In the present report of the

ABSTRACT

State that the lands in their holdings are not sufficient for adorning their livelihood as their families are increasing day by day; that their Dharkast for lands resigned during famine time are not granted by the Taluk authorities; that there are toddy trees on the lands; that every land in their village has contained small nos of toddy trees; that the petitioners are not allowed to use leaves of the toddy for the purpose of hedges for their lands and for fuel; no thorns and firewood are

Available; that their sheep or goats are not allowed to graze in Govt. lands for which a tax (Kulbanni) is being paid annually; that if reasonable compensation is paid for their lands the petitioners will go to His Majesty's territories, where there are no troubles.

That the lands containing small no of toddy trees may be declared blue stone off from the list of toddy Vina and granted to the petitioners on payment of purchase, that separate rates be ordered to be given in respect for the lands containing toddy trees, that the above be observed and that such grants in which contains no toddy trees be given to the petitioners, ~~Grants required~~ if the petitioners are required by Govt. to remain in their territory.

No: 6395/254 Rec'd file

Excise Commissioner's office
Bangalore, dated 3rd January 1904

From

P. N. Perumaiya Esquire B.a
Excise Commissioner
in Mysore

To

H. V. Nanjundiah, Esquire, M. A. B. L
Secretary to the Government of His
Highness the Maharaja of Mysore
General and Revenue Departments.

Sirs,

I have the honour to acknowledge the
receipt of your Memorandum No. 210/Ex, dated 3rd
September last, forwarding for report a petition
from the ryots of Madalur village in the Sira
Taluk praying that certain lands of their village
may be removed from the list of date reserves and
to state as follows:—

x/Sent with
Returned

2. The petitioners complain (1) that lands
containing small number of date trees which
were once under cultivation, but relinquished
to Government owing to failure of rains
are reserved for date groves.
(2) That while they are not allowed to graze
their cattle in date groves, they are required

to pay the full amount of Melbaram fixed for the village; and

(3) that their applications for free grant of date leaves for domestic and agricultural purposes are refused on the ground that the groves are reserved.

3. With reference to the first item of complaint, I beg to submit a statement showing the particulars of Survey numbers proposed to be reserved for State Toddy Revenue. Out of Sixty Seven numbers, twentyfour are unassessed waste, twentythree are immemorial waste, and the remaining ones are those relinquished during the past ten years.

67
24
23

(23)

4. The Deputy Excise Commissioner who inspected the relinquished lands reports, that, as they generally held a good many trees, they were rightly included in the list of Government unoccupied Survey numbers containing date trees.

5. The petitioners do not state in their petition what survey numbers they want to be excluded from "Reservation". On being called upon by Mr. Davy, they have given

a list containing twenty eight numbers. But I doubt, whether they require them for purposes of cultivation. It would appear that they have got a Banjar area of nearly Sixhundred acres of assessed land available for cultivation.

6. Since the introduction of the System of levying tree rent at the rate of four annas, holders of lands containing date groves have been deriving good revenue from them, and that they are trying to secure such lands is evident from the fact that out of twenty Survey numbers tapped in Madalur this year twelve belong to private individuals. On this point, I beg to invite reference to Mr. Davy's remarks in para 7 of his letter (copy of which is herein enclosed)

7. As Sira Taluk has been supplying toddy to several Shops in this and His Majesty's Territories, any curtailment of the Government groves will affect the Excise Revenue, and I would therefore suggest that applications for date lands may be granted only when there are no other

Office of the Deputy Excise Commissioner
in Mysore

Dated Camp Sira $\frac{18}{22}$ September 190

From

W. Vinecombe Davy Esquire

Deputy Excise Commissioner in Mysore

To P. N. Purnaiya Esquire B. A

Excise Commissioner

in Mysore.

Sir,

With reference to your endorsement No:

$\frac{2059}{571}$, dated 3rd September 1903, forwarding for a very early report petition received in your office with Memorandum No: $\frac{210}{Ex.}$ of the same date, from the Secretary to the Government of Mysore, General and Revenue Departments and addressed by Shimmefouda and other Ryots of Madalur village, Baragoor Saumat, in the Sira Taluk, Tumkur District, to His Highness the Maharaja, praying that certain lands of their village may be removed from the list of "Date Reserves", as they contain only a small number of trees and be given out to them for cultivation, I have the honour to State that I arrived

at the dates on the 16th instant and remained there with the Amildar until the 18th idem, and made a thorough enquiry into the alleged grievances and with the Amildar inspected the Survey numbers which the ryots desired to have omitted from the Date Reserve List.

1. The peculiarity of this village consists in its having two large tanks that only fill once in about 4 or 5 years - consequently the lands under them are taken up and cultivated one year, and abandoned for four or more years, and it so happened, that when the Reserve List of this village was being Compiled, many of these lands were found to be "unoccupied", and as they generally held a good many trees they were rightly included in the list of "Government "unoccupied Survey numbers" containing date trees".

2. I asked for a list of Survey numbers which they wished omitted, and they gave me one Containing some 26 Survey numbers. I may mention our list has about 80 Survey numbers in this village which is a large one of some 3000 or 4000 inhabitants

and it must be remembered it is in the heart of the Dafe area. None of these 26 numbers have yet been applied for.

3. I found there are still some 600 acres of dry land occupied and uncultivated, so that there could not be any very urgent want for more dry lands seeing they held such a large proportion (600 out of 2,000 acres) that are still not under the plough.

4. Also out of 20 Survey numbers tapped this year only 8 numbers are Government uncccupied, and the remaining 12 numbers occupied by rujots who enjoy the rent for the trees.

5. As the Survey Department are now in this Taluk resurveying and settling it, I would ask that they may be requested to Rhode off such portions of Survey numbers as contain date trees, when the treeless portion may be available for cultivation. In these cases, the Survey Rule of not less than 6 acres of dry, 2 acres of irriga-ble or wet and one of garden land need not be observed.

observed.

6. As regards the reserve list I would suggest, it be allowed to stand as it is and the 26 Survey numbers alluded to in para 2 may be dealt with by the Amildar (when receiving applications for them) in accordance with my remarks made against each number on a Separate Statement herein enclosed which can be attached to the list as an appendix; this will keep the list in tact and meet the grievances of the petitioners.

7. It may not be out of place here to make a few remarks on our toddy supply throughout the Province generally. Already in some places the greater portion of our toddy supply is in the hands of ryots, and the danger of this to the government revenue should not be lost sight of, for if this is allowed to grow, the time may come when the ryot will be able to dictate his own terms and for every anna he charges in excess of the government tree rent (4 annas) an anna must come from the shop rent, and

and eventually these land holders will ab-
-sorb a large portion of the toddy revenue. This
should be borne in mind by those who think
the Date Reserve lists unnecessary, and who
would even advocate giving most of the lands
containing date trees to rayots because for both
they would protect them. They would indeed
in many cases, perhaps the majority protect
them and would also be the masters of the si-
-tuation as regards our toddy revenue. I
take this opportunity of sounding this note of
warning that if the toddy revenue is to be
kept up the greater portion of the source of toddy
supply must be in the hands of government and
this can only be done by most rigidly conser-
-ving such date reserves as are now left to
them. Had the compilation of these lists been
left for a few years later, the damage to this
source of Revenue would have been irreparable
I do not for a moment advocate that lands
containing date trees should in all cases be
reserved, but when given out it should be
expressly

expressly understood that the lands must be put under the plough, and not kept in the occupiers hands as a date reserve, for it stands to reason that if a Contractor has to pay 8 annas per tree instead of 4 annas as the extra 4 annas will come out of the Shop rent. I mention this, because it is evident in some parts that the ryots are inclined to acquire lands containing date trees to keep them uncultivated for the rent derivable from these trees, and as I before said it is most undesirable that any large proportion (it is already very considerable) should be in the hands of private holders. The correspondence connected with this Subject is herewith returned.

I have &c

OFFICE OF THE EXCISE COMMISSIONER IN MYSORE.

Bangalore, dated....26th July.....191.

FROM

M. Kantaraj Urs, Esq., B.A.
Excise Commissioner in Mysore.

To

H. V. Srinivasiengar, Esq., M.A.,
Secretary to the Government of
His Highness the Maharaja of Mysore,
General and Revenue Departments.

Sir,

With reference to your letter No. 783 S.C.O-3-4, [illegible] 6th June 1904 and subsequent reminders [illegible] curtailment of agricultural facilities [illegible] Talak, I have the honor to forward herewith copy of [illegible] the 23rd Instant, with its enclosures [illegible] personal and obliging [illegible] Commissioner, Tumkur District, stating [illegible] excepting gomal lands [illegible] already given out for cultivation for [illegible] encumbered with rock [illegible] have not at all been tapped for many years and [illegible] stunted in growth. He further states [illegible] waste lands are being given out for cultivation [illegible] good supply of water and this question may be considered.

2. For the foregoing reasons, I am of opinion that [illegible] -tions of the Deputy Commissioner may be accepted.

I have the honor to be,
Sir,
Your most obedient servant,

[signature]

for Excise Commissioner.

field. The trees are unfit for tapping and have never been tapped. It is contignous and in all respects similar to survey number 331 (old survey No.287).

6. These survey numbers (Nos.287, 288/2 and 288/3) may, therefore, be given out for cultivation.

7. Old survey number 72 has been phoded during the resurvey into numbers 86 and 87, measuring A G A G 1 - 39 and 2 - 10, with an assessment of Rs 7/- and Rs 9/- respectively. Both these survey numbers have been treated as wet lands and are under cultivation since 1910-1911.

8. Old survey number 71 has been divided into two survey numbers 83 and 84, measuring A G A G 2 - 20 and 4 - 9, respectively. Survey number 83 is under cultivation since 1910-11; and number 84 is a phoded number containing 105 date trees, with an assessment of Rs 1-12-0, and surround-ed on all sides by lands under wet cultivation. The trees in survey number 84 are reported to be stunted and unfit for tapping. This land is not fit for reservation and may be given out for cultivation as it would appear there are no young plants standing thereon.

9. Survey number 146 is under cultivation since 1910-11. Survey number 345/3 (Number 420 as per resurvey) is a kharab waste containing 80 date trees and situated in the midst of lands under dry cultivation. The trees in this survey number are reported to be not good and not required for tapping purposes. This land may, therefore, be removed from the list, as recommended by the Range Inspector.

10. The Gomal lands referred to are contignous numbers and form dense groves containing a large number of date trees. Trees are being - - tapped in these groves and the undersigned is not in favour of - - recommending the removal of these numbers from the reservation list. As however, these are Gomal lands wherein certain rights have been hitherto conceded to the ryots for grazing purposes, such rights may be continued with the requisite restrictions prohibiting the destruction of trees etc standing on these gomal lands, as it is reported that the said ryots

have

have no other lands available for grazing purposes.

11. As regards the other assessed waste lands, they may be given out for temporary cultivation to the ryots, when the tank receives a good supply of water, in accordance with the practice hitherto obtaining in respect of the lands in question.

The correspondence ending with the Sira Range Inspector's report No. 54, dated 14-7-1913, is herewith submitted for kind reference.
